Sajid Amin

(347) 971-5718 | New York City | Saminny06@gmail.com | [Linkedin](#) | [Portfolio](#) | [GitHub](#)

EDUCATION

St. John's University, College of Professional Studies *Expected May 2027*
Bachelor of Science in Computer Science *GPA 3.98*
Coursework: Data Structures and Algorithms, Object-Oriented Programming, Software Design, Computer Architecture, Database Management, Operating Systems, Machine Learning, Data Security, Fundamentals of Cybersecurity, Intro to Networks, Calculus 1 & 2, Stats 1 & 2, Discrete Math
Awards: Dean's List 23-24, Dean's List 24-25, Phi Eta Sigma National Honor Society, University Honors, **CodePath Web101 & Web102**

EXPERIENCE

Technology Consulting Intern | *Protiviti* **May 2026- August 2026**
- *Incoming Summer 2026*

AI Engineer Intern | *Sj Innovation LLC* **July 2025-August 2025**
- Built an AI agent on CollabAI by designing advanced prompts and integrating plugins to analyze public datasets, enabling automated detection of trends, anomalies, and key metrics
- Tested the agent on **10+ diverse public datasets** (market research, financial, and academic) to validate output quality, achieving **85%** accuracy in trend/anomaly detection and reducing manual analysis time by ~**70%** across researcher and analyst use cases.

Software Engineer Intern | *Chip Server LLC* **June 2025-August 2025**
- Reduced instructor prep time by **30%** by engineering a real-time whiteboard in React and WebSocket with support for dynamic annotations on blank canvases, PDFs, and Word documents, featuring custom stroke rendering algorithms and multi-touch gesture support
- Boosted student engagement by **45%** with a scalable quiz system using React Context API, Express REST APIs, and WebSocket sync
- Used Jest for unit, integration, end-to-end testing of WebSocket connections and multi-user scenarios

Full-Stack Engineer Intern | *Mancer Robotics* **November 2024-June 2025**
- Integrated LiDAR hardware with a computer system and successfully visualized captured point cloud data using Open3D, enabling initial spatial mapping of the environment
- Built and deployed a marketing website and landing page to onboard early beta testers and gather user feedback

Software Engineer Intern | *Institute for Machine Learning* **September 2024-December 2024**
- Built a responsive React-based website supporting **100+ users**, streamlining client onboarding and enabling seamless login
- Enhanced UI/UX of login page, reducing loading times and bounce rate by **25%** and improving time-on-page by **15%**
- Designed backend with Maven and SQL, securely handling **1000+ authentication events** during testing

PROJECTS

Rebin **github.com/Sajidcodez/Rebin**
- Built an AI waste sorting application using React, TypeScript, FastAPI, and Supabase, providing real-time image recognition and recycling guidance based on users local policies.
- Integrated YOLOv8 for object detection and Gemini AI for reasoning and a **85%** improvement in a accuracy through model optimization
- Designed a full-stack app using Docker containerization and GitHub Actions CI/CD pipelines to ensure performance and reliability

NoteBeats | *STJHacks* **github.com/Sajidcodez/NoteBeats**
- Built a full-stack Next.js app that converts study notes into musical audio, featuring a responsive UI with TailwindCSS and TypeScript
- Integrated AI services like OpenRouter, ElevenLabs, Hugging Face to enable lyric generation, voice synthesis, and text summarization, using real-time streaming for seamless audio delivery
- Created backend APIs for content processing and audio generation, utilizing AWS S3 for asset storage and external APIs for audio merging

Co2-Leaderboard | *NYUHacks* **github.com/Sajidcodez/Co2-Leaderboard**
- Created a tracking application using **React, TypeScript, Flask**, and **PyTorch**, with machine learning prediction for future emissions trends
- Implemented dashboard with US map and real-time analytics, leveraging Recharts and React Simple Maps for data visualization
- Built a neural network model in **PyTorch** to predict CO_2 emissions on historical data, improving forecasting accuracy and insights

LEADERSHIP/PROFESSIONAL DEVELOPMENT

CodePath Tech Fellow | *CodePath* **June 2025-Present**
- Mentor and assist the next generation of software engineers and tech enthusiasts through hands-on activities and project based learning

St. John's ACM Student Chapter | *ACM* **September 2024-Present**
- Expand technical skills and career readiness by engaging in **30+** workshops and labs, covering Python, APIs, AWS, & Web Development
- Collaborated with **16+ peers** using **ACM resources** to apply software engineering and problem-solving skills on open-source projects.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, HTML, CSS, C++, SQL
Frameworks: React, Next.js, Node.js, Express.js, Tailwind CSS, Spring Boot, Flask, Django, Bootstrap
Cloud & Databases: AWS, Azure, MySQL, PostgreSQL, MongoDB, Supabase, Vercel
Developer Tools & Skills: Git/GitHub, Bash, Docker, Postman, 3D Modeling/Rendering, Augmented Reality, PyVista, Matplotlib, Selenium, Jest, Figma, Canva, MacOS, Windows, Microsoft Office Suite
